

I am very interested in investigations of starvation for improving health.

I am the young Russian researcher and have highest medical education and experience in research work in biological field and would like to work on this problem.

Can anybody send me the addresses of the hospitals or Medical Centers where scientific problems of human starvation for the health are investigated?

Also I would like to set scientific contacts with colleagues who deals with investigations in this field.

I would be very appreciated anyone reply me.

Pls, contact by post: 142292, Russia,

Moscow Region,

Puschino,

P.O. box 46,
