

Toronto Siggraph

What: ``Chance's Art": 2D Graphics and Animation on the Indigo.

By: Ken Evans, Imagicians Artware, Inc.

When: Tuesday 20 April 1993 7:00pm-9:00pm

Where: The McLuhan Centre for Culture and Technology

University of Toronto

39A Queen's Park Crescent

Toronto

Who: Members and non-members alike

(non-members encouraged to become members...)

Abstract:

Imagicians Artware, Inc. is entering into early beta site testing on Silicon Graphics workstations of a new 2D abstract artwork and animation package called Chance's Art. The package will be described and demonstrated, and some of the technical issues will be discussed. Marketing plans will be outlined. The talk will also present some of the technical and business problems increasingly confronting small startup software companies today, and some of the opportunities this situation presents.

Time after the event will be allocated for hands-on demonstrations to interested parties. Silicon Graphics is graciously providing an Indigo for this event. Myck Kupka will also be demonstrating his computerized interactive reflective stereoscope, which is installed upstairs in the McLuhan Centre, so feel free to drop by for a demonstration before or after the event. BTW, be sure to sing "Happy Birthday, Myck"...

The names of nominees for our Siggraph executive offices will be announced at this meeting. Nominations will still be open until the election at our

May 18th event; call Myck Kupka at 465-0943 or fax to 465-0729.

Directions: The McLuhan Coachhouse is on the east side of Queen's Park

Crescent, just NORTH of Wellesley, SOUTH of St. Joseph St., BEHIND (EAST of)

39 Queen's Park Crescent, which is the centre for Mediaeval Studies.
